This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.					
2. This REPORT consists of a total of 5 sheets, including this cover sheet.					
3. This report is also accompanied by					
<u></u>	· -				
	and to the International B	-	sheets, as follows:		
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).					
sheets which	supersede earlier sheets, bu	ıt which this Author	ity considers contain an amendment that goes		
beyond the dis	sclosure in the internations	al application as filed	d, as indicated in item 4 of Box No. I and the		
b (sent to the Internatio			number of electronic carrier(s))		
, containing a sequence listing and/or tables related thereto, in electronic form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).

Box	k No. I	Basis of the report				
1.	With	regard to the language, this report is based on:				
the international application in the language in which it was filed						
		ranslation of the international application into				
		which is the language of a translation furnished for the purposes of:				
		international search (Rules 12.3(a) and 23.1(b))				
		publication of the international application (Rule 12.4(a))				
		international preliminary examination (Rules 55.2(a) and/or 55.3(a))				
2.		regard to the elements of the international application, this report is based on (replacement sheets which have be ned to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally file te not annexed to this report):				
		the international application as originally filed/furnished				
	Ш	the description:				
		pages as originally filed/furnished				
		pages* received by this Authority on				
		received by this Authority on				
	Ш	the claims:				
		pages as originally filed/furnished				
		as amended (together with any statement) under Article 19				
	П	pages* received by this Authority on the drawings:				
		pages				
		pages* as originally filed/furnished				
	-	pages* received by this Authority on				
		a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.				
3.		The amendments have resulted in the cancellation of:				
		the description, pages				
		the claims, Nos.				
		the drawings, sheets/figs				
		the drawings, sheets/figs the sequence listing (specify):				
		any table(s) related to the sequence listing (specify):				
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been rade, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).				
		the description, pages				
		the description, pages				
		the claims, Nos.				
		the drawings, sheets/figs the sequence listing (process)				
		the sequence listing (specify): any table(s) related to the sequence listing (specify):				
. -	.					
		applies, some or all of those sheets may be marked "superseded."

PCT/FI2003/000538

Box No.	II Priority
1.	This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:
	copy of the earlier application whose priority has been claimed (Rule 66.7(a)).
	translation of the earlier application whose priority has been claimed (Rule 66.7(b)).
2.	This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.
3. Addi	tional observations, if necessary:
	•
•

Discussion.

The invention according to claim 1 refers to a method of producing a magnetically active shape memory Ni-Mn-Ga-alloy. A homogenous melt is cast and directionally solidified.

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box $\,V\,$

D1 and D2 are scientific reports on some properties of the material in question; in present claim 1 only a "metal alloy containing nickel, manganese and gallium" is specified. According to D1 and D2, single crystal specimens are produced by laboratory means, such as the Bridgman method. However, according to D5, the Bridgman method is to be considered to be a method of manufacturing directionally solidified objects. The Bridgman method can be used in industrial production of objects, see D5. Consequently, the present method merely defined as "directional solidification" lacks novelty.

The further feature in claim 1 that a temperature range below the liquidus temperature during solidification is stated is not considered to involve an inventive step as being within the skill of a professional in the technical field to find out.

The features disclosed in claims 2-12 are obvious to a person skilled in the art.

D3 and D4 were cited to show the general state of the art not considered to be of particular relevance. D5 was cited to disclose the essential features of the Bridgman method.
